When transferring tickets you'll receive two (2) emails: one confirming your ticket(s) have been sent and another when your recipient accepts the tickets you sent. Your recipient will also receive an email or SMS prompting them to accept your tickets. Once the ticket transfer has been accepted, the tickets in your account are no longer valid and you will not be able to get into the event with those tickets. Additionally, once a transfer is accepted it cannot be cancelled and tickets cannot be recalled by the original owner. Those receiving a ticket transfer must have an existing Ticketmaster account or create a new Ticketmaster account when prompted.
